

The 1890 Casey County, Kentucky, "Census" Reconstructed from the 1890 tax lists

The United States Census taken as of June 2, 1890, was destroyed by a fire in 1921. It had collected the following information:

1. address
2. number of families in house
3. number of persons in house
4. names
5. whether a soldier, sailor or marine (Union or Confederate) during Civil War, or widow of such person
6. relationship to head of family
7. race, described as white, black, mulatto, quadroon, octoroon, Chinese, Japanese, or Indian
8. sex
9. age
10. marital status
11. married within the year
12. mother of how many children, and number now living
13. place of birth of person, and their father and mother
14. if foreign-born, number of years in US
15. whether naturalized
16. whether naturalization papers have been taken out
17. profession, trade or occupation
18. months unemployed during census year
19. ability to read and write
20. ability to speak English, and, if unable, language or dialect spoken
21. whether suffering from acute or chronic disease, with name of disease and length of time afflicted
22. whether defective in mind, sight, hearing or speech, or whether crippled, maimed or deformed, with name of defect
23. whether a prisoner, convict, homeless child, or pauper
24. home rented, or owned by head or member of family, and, if owned, whether free from mortgage
25. if farmer, whether farm is rented, or owned by head or member of family; if owned, whether free from mortgage; if rented, post office box of owner

The gap between 1880 and 1900 is significant for genealogists, and this research is an effort to partially fill the void.

In 1880, the population of Casey County was **10,983**. In 1890, the population was **11,848**, an increase of 7.9%. This might lead us to infer that the residents in 1890 were much the same as the residents in 1880, but we have no way to verify that premise or to show that they were not completely or substantially different people. **We are working to analyze the 1890 data.**

By 1900, the population had grown to **15,144**, an increase of 27.8% in only ten years!

First, we are indexing the 1890 Veterans Census, which does survive, and adding to the information originally provided by the veteran, or survivor: the military record from an independent source; the family of the veteran; and, the burial place of the veteran. Details of that research is entirely separate from this.

In this effort, we are indexing the raw 1890 tax assessment for Casey County and will make the raw data of its listings available on the Internet in downloadable PDF format. Just as the 1790 and 1800 Censuses have been reconstructed from tax lists, with all their imperfections and omissions, we will at least have more that we have had before.

If the researcher is lucky enough to find the name of a resident in the index we are preparing, then reference to the raw data will then provide answers to the following questions (with answers to the bold questions being included in the index):

Notice particularly Items 76 and 79, as these may help to identify the family and its members. We should be able to estimate the number of females over 21 from the

number of males, and the number of children under six from the average of children aged six to twenty. Nevertheless, from other research we can determine that not all males over 21 were listed.

In order to take the tax assessment, the county was divided into nine “precincts.” Whether these coincided with existing magisterial precincts is not known.

The assessments were made on sequentially numbered “parts” which could contain up to forty taxpayers or properties per part. Since the parts were numbered from one to eighty, knowing the part number is more important than knowing the precinct number. The actual breakdown is as follows:

Precinct 1	Parts 1 through 16
Precinct 2	Parts 17 through 31
Precinct 3	Parts 31 through 43
Precinct 4	Parts 44 through 53
Precinct 5	Parts 53 through 67
Precinct 6	Parts 67 through 72
Precinct 7	Parts 73 through 78
Precinct 8	Parts 79 through 92
Colored 9	Parts 93 through 96

The raw data was on microfilm at the Kentucky Department of Libraries and Archives and has been converted to digital in its negative format. ***For ease of printing, we will also scan and provide this on our website in positive format.***

The primary data taken in the field was probably in household sequence, but that copy has not been found, thus eliminating some interesting information. The secondary copy was not perfectly alphabetized, but all names starting with the same letter in the same precinct were listed together. We have combined and resorted the lists.

The master indexes we have compiled have names in two formats: Names of taxpayers, whether residents or not; names of nearest actual residents to the property. Consulting both may assist in identifying families and their location in the county.

Please provide your family information for the vertical family files in the Casey County Library. Unless we record our memories, they will be lost to future generations.
